

HOW WE WIN

The Climate and Clean Energy Equity Fund is building a broad, diverse and powerful base of popular support for equitable climate action, state by state.

We do this by supporting the leadership and organizing of multiracial, working-class communities through deep and sustained funding, capacity building, technical assistance, and donor advising—because climate progress is only durable when it creates economic and racial equity.

A leader in climate philanthropy, the Equity Fund partners with community-based organizations in 13 states, matching our investments with expert policy analysis and narrative strategy in order to build local and state-wide power. Together, we are generating the momentum to win ambitious and equitable policies that address climate change and advance clean energy.

STATES WHERE WE ARE ADVANCING CLIMATE EQUITY

Arizona	Colorado	Florida
Georgia	Illinois	Maryland
Michigan	Minnesota	Nevada
New Mexico	North Carolina	Pennsylvania
Virginia		

PROGRAMMATIC SUPPORT

Building a movement for an equitable clean energy future where we can all thrive.

Our grantmaking, combined with robust technical and policy assistance, supports over 175 community partners across rural, urban and suburban geographies to lead large-scale advocacy, strategic communications, and nonpartisan civic engagement initiatives. The Equity Fund's grantee partners are building power to achieve equitable climate action and a just transition to clean energy.
